Pages R288-R290: Letters to the Editor, Reply, R. J. Connett and C. R. Honig. "Metabolic control in exercising skeletal muscle." The sentence beginning at the very bottom of page R289 and continuing at the top of page R290 should read: "The salient feature of the system is that the concentrations of ADP, ATP, PCr, Cr, and P_i are so interdependent through the actions of creatine kinase and adenylate kinase that the system has only one degree of freedom: measurement of change in any one of the above compounds completely defines the change in any of the others (1)."

**Computerized Editing**

Can you supply a disk for your **accepted** manuscript? The Publications Office is encouraging the submission of disks for accepted manuscripts for the American Journal of Physiology and the Journal of Applied Physiology. Such disks should meet the following criteria: 5½-inch low-density disks preferably using WordPerfect (or other DOS-formatted) software done on an IBM PC or compatible.
