INVITED REVIEW
Mechanisms regulating angiotensin II responsiveness by the uteroplacental circulation
C. R. Rosenfeld

CARDIAC, RENAL, AND RESPIRATORY INTEGRATION
Impaired renal D₁-like and D₂-like dopamine receptor interaction in the spontaneously hypertensive rat

Nitric oxide synthase and cGMP-mediated stimulation of renin secretion
C. M. Sayago and W. H. Beierwaltes

Reductions in systemic oxygen delivery induce a hypometabolic state in the turtle Trachemys scripta
B. Platzack and J. W. Hicks

Age-dependent renal responses to the bradykinin B₂-receptor antagonist icatibant in conscious lambs
A. Patel and F. G. Smith

THIRST AND VOLUME, ELECTROLYTE HOMEOSTASIS
Antidipsogenic effects of eel bradykinins in the eel Anguilla japonica
Y. Takei, T. Tsuchida, Z. Li, and J. M. Conlon

Influence of oral and gastric NaCl preloads on NaCl intake and gastric emptying of sodium-deficient rats
M. G. Tordoff and S. A. McCaughey

Estradiol impairs hyposmoregulatory capacity in the euryhaline tilapia, Oreochromis mossambicus
M. M. Vijayan, A. Takemura, and T. P. Mommsen

NEUROHUMORAL CONTROL OF CIRCULATION AND HYPERTENSION
Activation of the kallikrein-kinin system by cardiopulmonary bypass in humans
D. J. Campbell, B. Dixon, A. Kladis, M. Kemme, and J. D. Santamaria

Comparison of the exercise pressor reflex between forelimb and hindlimb muscles in cats
N. Hayashi, S. G. Hayes, and M. P. Kaufman

(Continued)
Static handgrip exercise modifies arterial baroreflex control of vascular sympathetic outflow in humans

A. Kamiya, D. Michikami, Q. Fu, Y. Niimi, S. Iwase, T. Mano, and A. Suzumura

Cardiovascular changes induced by central hypertonic saline are accompanied by glutamate release in awake rats

Q.-H. Jin, Y. Ueda, Y. Ishizuka, T. Kunitake, and H. Kannan

Analysis of the afferent limb of the vesicovascular reflex using neurotoxins, resiniferatoxin and capsaicin

Y.-C. Chuang, M. O. Fraser, Y. Yu, J. M. Beckel, S. Seki, Y. Nakanishi, H. Yokoyama, M. B. Chancellor, N. Yoshimura, and W. C. de Groat

Yet another statistic to index baroreflex function (Letters to the editor)

J. A. Taylor and M. A. Cohen; M. Di Rienzo

LOCAL CONTROL OF CIRCULATION

Effect of nicotine on vasoconstrictor and vasodilator responses in human skin vasculature

Estrogen and progesterone effects on transcapillary fluid dynamics

N. S. Stachenfeld, D. L. Keefe, and S. F. Palter

Endothelial function and myogenic reactivity in small mesenteric arteries of hyperlipidemic pregnant rats

DEVELOPMENT AND TISSUE PLASTICITY

Erythropoietin responses to progressive blood loss over 10 days in the ovine fetus

B. D. Sohl, C. Y. Cheung, J. A. Widness, and R. A. Brace

Regulation of fetal cardiac and hepatic β-adrenoceptors and adenylyl cyclase signaling: terbutaline effects

J. T. Auman, F. J. Seidler, and T. A. Slotkin

Na⁺-K⁺-ATPase gene expression in the avian eggshell gland: distinct regulation in different cell types

I. Lavelin, N. Meiri, O. Genina, R. Alexiev, and M. Pines

Comparison of cerebrospinal fluid transport in fetal and adult sheep

R. Mollanji, C. Papaiconomou, M. Boulton, R. Midha, and M. Johnston

APPETITE AND OBESITY

Aldosterone suppresses expression of an avian colonic sodium-glucose cotransporter

G. Laverty, S. Bjarnadottir, V. S. Elbrønd, and S. S. Árnason

Expression and functional activity of P-glycoprotein in cultured hepatocytes from Oncorhynchus mykiss

A. Sturm, C. Ziemann, K. I. Hirsch-Ernst, and H. Segner

Expression of a chimeric retroviral-lipase mRNA confers enhanced lipolysis in a hibernating mammal

V. W. Bauer, T. L. Squire, M. E. Lowe, and M. T. Andrews

Gastric negative feedback produced by volume and nutrient during a meal in rats

S. Eisen, J. D. Davis, E. Rauhofer, and G. P. Smith

Amylin infusion into rat nucleus accumbens potently depresses motor activity and ingestive behavior

B. A. Baldo and A. E. Kelley

(Continued)
Plasma hormone levels and central c-Fos expression in ferrets after systemic administration of cholecystokinin

I. Billig, B. J. Yates, and L. Rinaman

Effects of selective hyperglycemia and hyperinsulinemia on glucose transporters in fetal ovine skeletal muscle

Intestinal perfusion induces rapid activation of immediate-early genes in weaning rats

L. Jiang, H. Lawsky, R. M. Coloso, M. A. Dudley, and R. P. Ferraris

Estradiol increases glucagon's satiating potency in ovariectomized rats

N. Geary and L. Asarian

INFLAMMATION, CYTOKINES, AND TEMPERATURE REGULATION

Acute G-CSF therapy is not protective during lethal E. coli sepsis

Heat shock protects L6 myotubes from catabolic effects of dexamethasone and prevents downregulation of NF-κB

G. Luo, X. Sun, E. Hungness, and P.-O. Hasselgren

Neutralization of interleukin-18 reduces severity in murine colitis and intestinal IFN-γ and TNF-α production

B. Siegmund, G. Fantuzzi, F. Rieder, F. Gamboni-Robertson, H.-A. Lehr, G. Hartmann, C. A. Dinarello, S. Endres, and A. Eigler

COMPLEX FUNCTIONS OF THE CENTRAL NERVOUS SYSTEM, SLEEP

Potentiation of glutamatergic synaptic input to supraoptic neurons by presynaptic nicotinic receptors

D.-P. Li and H.-L. Pan

Orexin depolarizes rat hypothalamic paraventricular nucleus neurons

Hypocretin/orexin suppresses corticotroph responsiveness in vitro

W. K. Samson and M. M. Taylor

Glutamate and GABA mediate suprachiasmatic nucleus inputs to spinal-projecting paraventricular neurons

L.-N. Cui, E. Coderre, and L. P. Renaud

CORRIGENDA

Volume 280, June 2001

Volume 49, June 2001

This article was incorrectly categorized in the table of contents. The correct category is “Regulatory and Integrative Physiology.”
SPECIAL NOTICE

AJP-Regulatory, Integrative and Comparative Physiology

To facilitate transmission of manuscripts to the new Editor-in-Chief, Dr. Pontus B. Persson, at Charité, Medical Faculty of Humboldt-Universität Berlin, as of July 30, 2001, all manuscripts for this journal are to be submitted to www.apscentral.org where they will be assigned electronically by Dr. Persson to Associate/Reviewing Editors, who will in turn solicit reviews. Manuscripts will then be placed on a secure website for electronic review.

For AJP-Regulatory, Integrative and Comparative Physiology, please go to

Preparation for Figures Electronically?
Help is on the Way!

LOOK for changes to the Instructions for Authors on our website at www.the-APS.org that reflect our migration to industry standards for preparing digital artwork for print and online publication. Following these guidelines will allow your digital figures to be produced more efficiently with higher quality reproduction. These comprehensive guidelines are searchable, so that you can find the information you need. And if you can't find it on the site, your questions are answered via e-mail by our printer's experts within 24 hours.

Special Call for Papers

American Journal of Physiology-Regulatory, Integrative and Comparative Physiology

Translational Physiology

The American Journal of Physiology-Regulatory, Integrative and Comparative Physiology is soliciting the submission of original manuscripts in the field of Translational Physiology, an area of research that bridges the gap between basic physiology and patient care. Papers in this field may transfer clinical insights into hypotheses that can be tested and validated in the basic research laboratory, or they may transfer knowledge gained from basic research to human physiology or even to improved methods of treating or preventing disease.

The responding authors should indicate in their cover letter that the submitted manuscript is in response to this special call for papers. The manuscript will undergo normal peer review. If published, the article will be highlighted as part of the Translational Physiology Series.

If you have any questions or already have a manuscript in this area submitted to the American Journal of Physiology-Regulatory, Integrative and Comparative Physiology and would like to have it included for this series, please contact the Editor, Dr. John Hall (Phone, 601-984-1803; Fax, 601-984-1817; E-mail, jehall@physiology.umsmed.edu).
